

MOVING FROM PROTEIN HYPE TO SUSTAINABLE FOOD SYSTEMS

CONCLUSIONS

There's lots of hype about meat and protein

It's narrowly focused on CO₂

It ignores how food is produced

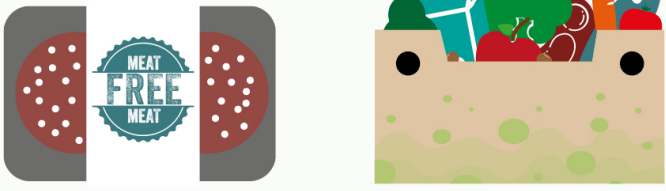

It ignores differences between world regions

It fails to see the whole food system

It's focused on simplistic silver bullet solutions

RECOMMENDATIONS

- 1 Focus on achieving a transformation to 'sustainable food systems' - not a 'protein transition'
- 2 Prioritize reforms that deliver on all aspects of sustainability starting at regional level
- 3 Reclaim public resources from 'big protein': realign innovation pathways with the public good, and reset the debate
